From numerical Egures to algori

The figures and the way in which met wells rounders today are that result of long development. Already in 1202, Leonardo Filte. Digit on 1202, Committe Filtermont . record of Place, referred to the great Importance of the "less figure." byther," New we puts the beginning of his book, "Liber

> "There are nove Hindu signs, Mills the help of "I", which means "with" on Assister, it is possible to with any number together with

And yet, although we can write any number with the help of only ten. Sports, the present day contrar ctalized world often demands simplified representation. Research, industry, trade and administration would not be plice time limit if they had not believed sols to large numbers and great variety of their disposal. These aids, from Teles to site: track computers, work by site: taking. The best technical solution for these instruments is therefore not our familiar "ten-figure tesbeet but the "two figure tentanc", the banary or third appears in

It is often called.
